WICKETS TURBO ACCESSORIES

Wickets Turbo Accessories are Wicket add-on applications that help promote your business. They are all controlled by free PC software called Wickets Turbo Accessories, which communicates data to/from the remote stations described below.

JACKPOT STATION The Jackpot Station includes a wall-mounted LED scrolling display with Wicket Reader. Customers must come to your business weekly (or bi-weekly) to read their Wickets at the Jackpot Station to qualify for the next automated drawing. Random drawings are made from all read or registered Wickets. The winner is displayed on the scrolling display and must return to your business to claim the jackpot if he has won. The winner could receive money back on his Wicket card or a check as setup by the owner. Turbo Accessories Computer & 24vac power not included.

List \$1,069.00

WICKET TURBO ACCESSORIES

REGISTRATION STATION The Registration Station includes a wall-mounted LED scrolling display with Wicket Reader. When a Wicket holder presents his card to the Reader the display will scroll the Wicket UserID three times to enable the customer to fill out an information card that the wash owner can enter into the system at a later time. An already registered card will scroll the customer's name. Turbo Accessories Computer & 24vac power not included. **List \$1,069.00**

REDEMPTION STATION The Redemption Station includes a wall-mounted LED scrolling display with Wicket Reader. When a Wicket holder presents his card to the Reader the display will scroll is Account Balance, Bonus Balance, and Loyalty Points which may be redeemed here for Bonus Bucks – all without having to chase down the attended. If Wicket holder is registered and it is on (or optionally near his birthday) you can automatically reward him with a few Birthday Bonus Bucks. Turbo Accessories Computer & 24vac power not included. **List \$1,069.00**

REG/REDEMP STATION Combines both the Registration Station and Redemption Station into one unit. It includes a wall-mounted LED scrolling display with Wicket Reader and a selector switch to indicate which mode to use. Turbo Accessories Computer & 24vac power not included. **List \$1,539.00**

Night Access Control System

A door-mounted Wicket Reader, an interface/power module, and an electric strike to release the door latch allow your Wicket customers to have night access to your business facilities. The stand-alone (-SA) version does not require any computer or network and provides access if the Wicket has the correct SiteID. The Turbo Accessories (-TA) version requires a data link to the Turbo Accessories Computer to check the Wicket UserID with the registration database. It has been reported that 24-hour washes will increase cash flow from 15 to 25% with no additional personal required.

WK-NAC12VSA-KIT The stand-alone version is excellent for night access of on premises laundries and other businesses where Wickets can be tightly controlled by management. Only Wickets with the correct SiteID code can open the door. Includes door-mounted Night Access Reader Box, Night Access Controller, universal power adapter, electric strike, connection cables, deadlatch, mortise cylinder lock, and exit paddle. ***Keyed flush bolt and power loop available for double door applications. **List \$4,000.00**

WK-NAC12VTA-KIT The Turbo Accessories version allows you to limit access only to your registered customers so you know exactly who was there and when they were there – and they know it and behave. Includes door-mounted Night Access Reader Box, Night Access Controller, universal power adapter, electric strike, connection cables, deadlatch, mortise cylinder lock, and exit paddle. ***Keyed flush bolt and power loop available for double door applications. Turbo Accessories Computer not included. **List \$4,000.00**

Consult factory for pricing on double doors.
