SUBJECT: UPDATE ON INSTALLING OUR XEPTORS® IN WMSG MACHINES

Installing our Xeptors® in Williams Gaming Machines:

1. If any Williams Gaming Slot Machine OS (Operating System) Version 5.14 and earlier the OS Version has to be updated to something above 5.14. There were no RAM Clear Chips to set up our Xeptors® below 5.14. Maybe our Xeptors® will work without changing to 5.14 and above??
2. If OS is above 5.14 then the following RAM Clear Chips, a different one per denomination per machine must be used if replacing any brand of acceptor with IDX.

Types of RAM's Clear Chips

- A. Video Slant Model 360 Machine
- B. Reel Slant Model 350 Machine
- C. Video Upright Model 550 Machine
- D. Reel Upright Model 40S Machine

The Video Upright and Video Slant (A&C) is the same RAM Clear Chip, but there is still one per denomination on coin or token. The Reel Slant and Reel Upright (B & D) is also the same RAM Clear Chip.

Mr. Jim Cosentino is sending us a write up from Williams Gaming with more detail. The correct RAM Clear Chips can be supplied from Williams Gaming Field Offices as per Jim Cosentino. The correct RAM Clear Chips have a look up table with different parameters.
