

IDX Revalue Stations

Dispense And Revalue Stored Value Wickets

11/11/2008

Overview

These Revalue Stations were designed to provide your customers with a way to obtain and revalue Wickets in a self-service establishment to essentially provide the same convenience as an attended business. These machines feature heavy-duty cabinet construction with high security crank locks, stainless steel faceplate and tough Lexan graphics decal to help protect your investment. They have a rear load configuration for servicing the bill acceptor, Wicket dispenser, and coin hopper. The hand held Extended Function Module (**EF Module**, see picture at right) is also accessible from the rear for configuring operational parameters and retrieving machine usage statistics. These Revalue Stations are made for us to our exacting specifications by Standard Change-Makers, Inc.

The Revalue Station models are pictured below with a list of the major component parts that come with that model. A list of options available for the Revalue Stations is posted at the bottom of this page. A Zipped Docs file containing the technical documents for the major components is available online.

Model 1

- WR88 Wicket Reader / Writer
- Wicket Card Dispenser (Holds 100)
- Mars 2612 Bill Acceptor
- 2-Line LCD User Display
- 32"H x 18"W x 13"D -- 150VAC 10A

Model 1A

- Credit Card Reader
- Receipt Printer
- WR88 Wicket Reader / Writer
- Wicket Card Dispenser (Holds 100)
- Mars 2612 Bill Acceptor
- 2-Line LCD User Display
- 32"H x 18"W x 13"D -- 150VAC 10A

Model 2

- WR88 Wicket Reader / Writer
- Wicket Card Dispenser (Holds 100)
- Mars 2612 Bill Acceptor
- 2-Line LCD User Display
- 32"H x 18"W x 13"D -- 150VAC 10A
