Due to the volatility of the metal market, Custom Quoted Token pricing is only good for 30 days. The advanced technology of the IDX X10 series of Xeptors and the X-Mark or Smart-Mark site-specific tokens is the only token system that eliminates cross play (acceptance of other companies, or competitors tokens) in the car wash industry. This is achieved because of IDX’S patented technology and only IDX can guarantee that we will never sell a duplicate dedicated token that has been assigned to you within 100 to 150 miles of your establishment. The X10 Xeptor is the only token acceptor that does not allow cross play when programmed with the assigned X-Mark or Smart-Mark site-specific token and rejects all other non-coded pieces of metal out there disguised as a token. IDX monitors the placement of each X-Mark & Smart-Mark site-specific token code for each company location and matches it with the correct model of X10 Xeptor. Other manufactures of coin acceptors and tokens cannot match this guarantee.
