

ASGARD™

WASH CLUB FOR TUNNELS & AUTOMATICS
WINDSHIELD TAG SYSTEM FOR ADDITIONAL PROFITS

IDX ASGARD Windshield tag system allows the car wash owner to increase revenue by optimizing an unlimited, loyalty, prepaid, fleet, or pay per use wash club program. ASGARD allows the customer to get a wash whenever and as often as they want, for a single fixed monthly or annual price. Designed with maximum compatibility in mind Asgard will function with any of the IDX Selecta-A-Wash replacement pay station doors or most any existing pay station or wash controller.

ASGARD will operate as a single site or can be configured to network multiple sites together, to allow the tagged vehicle to wash at any of the networked locations.

The ASGARD system has an administrative website for location owner monitoring / managing of the networked location(s), and a user access for wash selection and payment options. Recurring billing is also supported, to eliminate the need to manually run credit cards for wash club payment.
