

# Tidal Wave 3000™

## TOUCHLESS AUTOMATIC

The IDX TWA3000 is one of the fastest touch-free in-bay automatics in the industry today. It is able to wash more cars per hour by washing three sides of a vehicle simultaneously, compared to competitive models that wash only 1 1/2 sides at a time. Its unique design cuts down on wasted movement, thus increasing throughput.

The TWA3000, powered by IDX Wash Commander's smart technology carefully determines the length and width of each vehicle. This feature allows you, the operator, the versatility to wash anything from the smallest cars to the longest double cab pickups, even dually trucks. Its great functionality also permits the selection of wash cycles just right for each location. Different geographical locations have different needs to produce clean cars and every IDX product offers that flexibility.

IDX developed the TWA3000 to effectively clean more cars per hour. Its highly efficient chemical delivery system, along with maximum water impingement, provides optimum wash results. To further enhance cleaning, computer controlled on-board side rotating side and rocker panel blaster nozzles and underbody wash are included as standard equipment.

Better cleaning ensures customer loyalty

## SYSTEM ENHANCEMENTS

- Electronic Scanning and Positioning
- Triple or Rain Foam Shine System
- Onboard Foamy Tire Cleaner
- Lava Foam Wax Bath
- Spot Free Rinse System
- Two-Step Presoak
- Heated Presoak
- IDX Wash Commander Internet Communication
- Freeze Prevention Package
- LED Lighted Wands
- VFD Drive Bay Pump Package
- Free Standing Dryer
- Instructional LED Sign Packages
- Optional 102" Height Version Available
- Zero Degree Oscillating Nozzles
- Door Controls
- IDX Wash Commander Wash Buy-Up

## OPERATE REMOTELY

- ✓ 24 Hour Alerts
- ✓ Sales and Diagnostic Reports
- ✓ Operational Alerts
- ✓ Operate Equipment Remotely
- ✓ Text or Email
- ✓ Real-Time Interface
- ✓ Reset Equipment
